

## TOM RNA

- Superior Synthesis Performance.
- High Quality RNA oligonucleotides. Overall reduced time: coupling, base deprotection, TOM deprotection, ease of purification.
- Studies to confirm **absence of formaldehyde adduct** formation (see our booth for further detail)

## L-DNA & L-RNA

- Mirror image DNA & RNA oligonucleotides  
Spiegelmers®  
Bulk, **Therapeutic** Grade  
Vast Applications in **Diagnostics**
- Modified Molecular Beacon Microarray platform with recognition tags

\*Spiegelmers are a registered trademark of Noxxon Pharma AG

## Reverse RNA

- **IsomerFree™**: No 3'-TBDMS isomer detected
- **Short Coupling Time**: 4min with ETT -> High quality of oligonucleotide synthesis due to low n-1 & n+1 impurities
- Ultra High Purity 3'-modifications (3'-Cholesterol, 3'-Disulfide, 3'-HEG/PEG) synthesized with ease
