

CHEMGENES CORPORATION

THE INDUSTRIES WIDEST ARRAY OF ULTRAPURE MODIFIED DNA/RNA SYNTHESIS REAGENTS ALONG WITH BULK MANUFACTURING CAPABILITIES.

As the industries earliest commercial supplier of phosphoramidites, ChemGenes Corporation remains committed to its supply of ultrapure DNA/RNA synthesis reagents to the R&D market. Our product line consists of hundreds of modified phosphoramidite catalog item selections. Still, we have manufactured a vast assortment of custom compounds displaying robust experience in the field.

Located in Wilmington, MA, Boston Massachusetts, North Shore, our state of the art facility is fully

equipped to handle bulk manufacturing at the industry norm. Ranging from RNA monomers to modified phosphoramidites and supports, our capacity to handle any bulk order reflects our unparalleled expertise in the DNA/RNA synthesis field.

ChemGenes has expanded its customer service department to ensure that our customers are satisfied with pricing and that delivery terms are properly conveyed such that research does not get affected.
