

25 Years. Over A Thousand Reagents. We're Just Getting Started.

The Widest Array of Ultra-pure Modified DNA/RNA Synthesis Reagents

As the oligonucleotide industry's earliest commercial supplier of phosphoramidites, ChemGenes Corporation remains committed to its supply of ultrapure DNA/RNA synthesis reagents to the R&D market. Our product line consists of hundreds of modified phosphoramidites, nucleosides, and supports and a vast assortment of custom compounds.

Bulk Manufacturing Capabilities

Located outside of Boston Massachusetts, our state of the art facility is fully equipped to handle bulk manufacturing at the industry norm. Ranging from RNA monomers to modified phosphoramidites and supports, our capacity to handle any bulk order reflects our unparalleled expertise in the DNA/RNA synthesis field.

All of us at ChemGenes are devoted to providing you with invaluable customer service and comprehensive technical assistance.
